Power Ring Film Capacitor™
50µF, 8,000Vdc

The 775D506980-106 Power Ring is a 8,000Vdc, 50µF high voltage pulse capacitor.

Electrical Specifications

SBE Part #: 775D506980-106
Capacitance/Tolerance: 50µF ±10%
DC Voltage Rating: 8,000Vdc

NOTE: This capacitor is specifically designed to withstand repetitive pulse discharges at high pulse currents with longer life than exhibited by more typical metallized High Voltage film capacitors. However, this capacitor is not recommended for applications requiring continuous voltage (constant charge) unless de-rated to 4,000Vdc Maximum. For a technical explanation and further information on the intended uses for this design please contact SBE engineering.

Dielectric/Construction: Patented pulse technology
Metallized Polypropylene film.
Series-section design, non-inductively wound.

Dielectric Withstand Voltage: Units 100% tested at DC potential of 9,000Vdc for two minutes at 25°C.

Peak-to-Peak Voltage: 10,000 V Max
When operated at this peak-to-peak voltage the capacitor can be expected to withstand ~5,000 discharges.
Reducing this value to 7,500 V peak-to-peak will increase discharge life on the order of 10 times.
Further reducing this value to 5,600 V peak-to-peak will increase this discharge life more than 1,000 times.
Reducing the Q of the discharge circuit will improve shot life for all cases. End of life for the above estimates is 10% capacitance reduction.

Insulation resistance: 2,000 MΩ Min at +25°C
ESR @ 10 kHz: < 0.2 mΩ Min at +25°C, typical
ESL: ~ 50 nH, minimum inductance connection. The actual capacitor loop inductance will depend on the application interconnect design.

Operating Temperature: -40°C to +85°C
Peak Current Rating: 100,000 Amps repetitive
Power Ring Film Capacitors™
SBE Part 775D506980-106

Mechanical Specifications

Diameter: 14.07” (357.4 mm)
Height: 3.35” (85 mm)
Core: Hollow phenolic core with 2.0” I.D. Meets UL-94HB Specs.
Terminals: Tin plated copper strap, 0.062” thick by 2.5” wide.
Encapsulation: Outer tape wrap and white epoxy potting.

Mechanical Mounting: If possible mounting of this unit using the core will help to provide stress relief for the terminals.

Marking:
- SBE: SBE company identification
- 775D106: SBE “short form” part number
- 50µF ±10%: Capacitance value and tolerance
- 8,000Vdc: DC voltage rating
- yyww-lot#-unit: Serial number (date code, lot number, unit number)
